

FISHERIES

The descriptions of fisheries in the following chapters present the situation as it was at the time of completion of the Eastern Caribbean Flyingfish Project in 1992. As such they represent a point in time in the development of flyingfish fisheries in the eastern Caribbean. Information on these fisheries has not been comprehensively compiled since then, but some updated descriptions can be found in the reports of the FAO WECAFC Ad Hoc Working Group on Flyingfish and the CARICOM Regional Fisheries Mechanism (CRFM) referenced in the final chapter (Chapter 26).
