

SSF Guidelines post-protocol priorities survey

This brief survey concludes the UWI-CERMES applied research (in collaboration with CANARI, CNFO and CRFM Secretariat) on incorporating the Small-Scale Fisheries Guidelines into the Caribbean Community Common Fisheries Policy (CCCFP). It is a case study on implementing the SSF Guidelines that is supported by FAO, and which ends on 30 April 2018. Visit the case study web page [<https://www.cavehill.uwi.edu/cermes/projects/ssf/index.aspx>] for more information and outputs.

We kindly ask that you take a few minutes to answer the following brief questions based on your own personal experience and expertise. Your responses will be anonymous and treated as confidential. The case study report and outputs will be made available online.

1. The FAO Global Assistance Programme for the implementation of the SSF Guidelines has four main components. Using the rating scale, please share your view on the relative importance of each of the main components for implementing the SSF Guidelines within CRFM.
