

The second lecture in 'A series of Seminars' is titled, "*International and European Business Law*" by **Dr. Damian Cyman** (May 31, 2022)

The purpose of this course is to examine the International and European Business Law. The course is premised on the notion that the student should develop a sound understanding of the main principles of public and private law that drive the development of EU. An important focus will be on the challenges related to the globalization of markets and dynamic technological development. Undoubtedly, blockchain and artificial intelligence will significantly affect the functioning of markets. Consumer protection, which plays an important role in a complex market offering diversified services, will also be discussed.

The course is designed to give students basic education, knowledge and skills concerning the structures of international and European business law, and concerning their sources, working materials and methods. After completing the course, students are expected to:

- Have the ability to identify problems of international business law
- To identify the system or systems of rules that are relevant for solution
- To have the ability to solve problems of international business law
- To have the ability to find relevant legal materials for the task, the ability to interpret and apply those materials in a relevant manner
- To have the ability to present the solution with an acceptable composition and an acceptable legal language
- To have the ability to present relevant and well-founded critical views on issues of international business law with an acceptable composition and an acceptable legal language

Classes are held by combining theoretical issues with practical classes, including discussion and case studies.

About the lecturer: Damian Cyman is a researcher at the University of Gdańsk in Poland. In his research activity, he focuses on business law, financial markets and consumer protection. He is also interested in issues related to the influence of new technologies, in particular blockchain and artificial intelligence on financial markets. Damian Cyman is the author of many publications in the field of financial law. As a visiting professor, he lectured at many universities around the world. He is also an advocate specializing in protecting investors and clients from banks and other financial institutions, while being an experienced trainer for judges, notaries, bailiffs and entrepreneurs
