Alissandra Cummins, Director of the Barbados Museum and Historical Society and Chair of the National Commission for UNESCO

"Careers in Caribbean museology and heritage have developed exponentially over the last 3 decades, both in terms of scope and complexity, particularly with the advent of public history and heritage tourism as a global industry. A wealth of options for history graduates, beyond the traditional careers in museum administration, curatorship, documentation and education, have emerged as Caribbean museums explore new mandates, new media, new methodologies and new meanings to frame national hi/stories, authenticate cultural identities and validate local memory beyond the artefact and the built landscape. Museum careers have never been more exciting and rewarding."
