

Welcome to the Department of Government, Sociology, Social Work and Psychology (GSSWP) and the beginning of an extraordinary academic journey. With a strong emphasis on regional perspectives, we in GSSWP endeavour not only to understand the complexities of human behaviour and social systems, but also to shape a more equitable and compassionate world

This year the Faculty of Social Sciences celebrates its 50th Anniversary. It is a time to ask bold questions, to listen and learn from those around you, and to discover your own voice and purpose. You will be encouraged to think critically, act ethically, and engage deeply with the world.

Our faculty through their research, dialogue, and hands-on experience, are poised to help you question assumptions, analyse structures, and envision new possibilities for justice, wellness, and democracy.

We invite you to participate in our outreach activities, check out our publications and engage with us, whether you are a student, visitor or alumnus/alumnae.

Wishing you inspiration, discovery, and success for academic year 2025-2026!
