## MESSAGE FROM THE DEAN

---

Welcome to the Faculty of Science and Technology (FST) at The UWI Cave Hill Campus! It is my great pleasure to serve as Faculty Dean and to be able to work with a team of staff who have a strong commitment to the training of a new generation of scientific professionals.

At its core, science probes the essence of things, technology benefits humankind by applying its findings, and our community of researchers – students, faculty, and staff – engage in world-class scientific inquiry, aimed at addressing issues facing not only our region but the world at large. We explore alternative sources of energy, analyse climate variability, champion marine conservation efforts, and interrogate and model the metabolic effects of non-communicable diseases in local populations to create a sustainable environment for future generations to inherit. Furthermore, our technological advancements have opened new horizons in multidisciplinary research, marrying machine learning and artificial intelligence, with health care, forensics, and education.

Our approach to scientific learning is collaborative and experiential, pillared on the understanding that answers to real-world problems require multiple perspectives, teamwork, and hands-on discovery. The Faculty consists of two academic Departments [the Department of Biological and Chemical Sciences (BCS) and the Department of Computer Science, Mathematics and Physics (CMP)], a graduate research centre [The Centre for Resource Management and Environmental Studies (CERMES)] and an affiliate institute [The Caribbean Institute for Meteorology and Hydrology (CIMH)] which delivers our Meteorology programme.

## THE FACULTY OF SCIENCE AND TECHNOLOGY UNDERGRADUATE PROGRAMMES AND COURSES HANDBOOK 2023-2024

We offer several three-year degree programmes: B.Sc. in Biochemistry, Biology, Chemistry, Computer Science, Ecology, Electronics, Environmental Science, Information Technology, Mathematics, Meteorology, Microbiology and Physics; and continue to offer a four-year B.Sc. Software Engineering degree. Joint programmes with the Faculty of Social Sciences (Management, Accounting and Economics) and the Faculty of Humanities and Education (Education and Psychology) also continue to attract considerable interest.

In addition to equipping our students with professional knowledge and practical skills, we aim to endow them with strong communication and problem-solving skills and professionalism appropriate for the workplace. Our cultivated relationships with local industry partners continue to yield professional placements which enable students pursuing any faculty major to gain real-life work experience and build a network of potential employers and industry leaders.

The Faculty has produced graduates who are contributing to the economic growth and prosperity of Barbados and the wider Caribbean region. Moreover, some of our undergraduates choose to pursue advanced studies at the Cave Hill Campus, while others successfully continue their education at global universities, confident in the fact that the fundamental knowledge acquired here will serve them well.

While at Cave Hill we also hope you complement your academic pursuits by engaging with one of the many science clubs and associations. We continue to be proud of the community work of the Cave Hill Environmental Club, and the outreach and mentorship efforts of the Chemistry Society and Computer Science Society. Our newest clubs, the FST Physics Club and the Cave Hill Meteorology Society, are welcomed additions and bring with them a supportive experience grounded in a common love for these science disciplines.

So, whether you are curious about science, or are a current or former member of our community, I invite you to explore our website and social media pages [Facebook: /uwicavehill\_fst; Instagram@uwicavehill\_fst] to learn more about the science initiatives, programmes and activities currently being pursued in the Faculty. We are a resilient and supportive Faculty endeavouring to improve the world hand in hand through shared knowledge and innovation. Join us on this journey of discovery!

Jeanese Badenock PhD  
Dean, Faculty of Science and Technology

## ABOUT THE UWI AND THE FACULTY

The University of the West Indies (UWI) is a regional and international institution primarily serving the needs of the Commonwealth Caribbean. Established in 1948 at Mona, Jamaica, as a college in special relationship with the University of London, it received full university status in 1962, as an independent degree granting institution. In 1960, a second campus was established at St Augustine, Trinidad, and in 1963 teaching started in Barbados, first at a temporary site at the Bridgetown Port and then at the Cave Hill Campus. Sciences have been taught at the Cave Hill Campus of the University of the West Indies from its inception. The Faculty was formerly known as the Faculty of Natural Sciences and later the Faculty of Pure and Applied Sciences before deciding that the name Faculty of Science and Technology (FST) best represented the degrees being offered. Our full-time academic staff are mainly Caribbean nationals, but we are also very much an international Faculty with about one third of our lecturers drawn from countries far and wide. Our degree programmes are well-respected regionally and internationally with many of our graduates working or pursuing further studies overseas.

The Faculty comprises of three sections:

- Department of Biological & Chemical Sciences (BCS) – undergraduate & graduate programmes
- Department of Computer Science, Mathematics & Physics (CMP) – undergraduate & graduate programmes
- Centre for Resource Management and Environmental Studies (CERMES) – graduate programmes

In the undergraduate BSc programme, courses are offered in all major scientific disciplines. Through collaboration with the Caribbean Institute for Meteorology and Hydrology (CIMH), the Faculty offers a BSc in meteorology. Students may major in one or two disciplines and current enrolment in the Faculty is approximately one thousand undergraduates, most of whom are full-time students. Science graduates may register for the research degrees of M.Phil. and Ph.D. under the supervision of a member of the Academic Staff. The Faculty also offers MSc. programmes in various fields. CERMES offers a MSc. in Natural Resource and Environmental Management, and more recently a MSc. in Sustainable Energy Management.

The Department of CMP offers a series of taught Masters programmes from the discipline of Computer Sciences. The Department of BCS offers a taught Masters and Diploma in Biosafety. The research interests in the Faculty are diverse, addressing both fundamental questions in Science as well as finding scientific solutions to real life problems facing the Caribbean region and its people. Faculty members also constitute an unmatched source of expertise to Governments, Non-Governmental Organisations and the Private sector in providing technical advice. The Centre for Commercial Analytical Services (CCAS) and the Centre for Agricultural Research and Innovation (CAGRI) have been recently established in the Faculty.

## PROFICIENCY TEST FOR NEW STUDENTS

All applicants to the University are required to take a proficiency test in English. The application form for the test is available online at <http://www.cavehill.uwi.edu/fhe/studyhumanities/english-proficiency-test.aspx>. This form should be returned/submitted at the same time as the normal application form, to the Admissions Section, Student Affairs at Cave Hill, Mona or St. Augustine, or to Resident Tutors or University Representatives in Non-Campus Countries.

The test is normally scheduled to take place in March preceding the start of the academic year. Students who have obtained one of the following are exempted from taking the test:

- Grade 1 in CSEC General Proficiency in English A
- Grade 1 or 2 in the CAPE Communication Studies
- Grade A in the Cambridge GCE O' Level English Language
- Grade A or B in the Alternative Ordinary (AO) General Paper
- Graduates of the Barbados Community College (BCC) receiving Grade B or higher in the course CORE 100 English and Communication.

Those who pass or are exempted from the test do one of the Level I English Language Foundation courses: (1) FOUN1006 or FOUN1008 offered by the Faculty of Humanities and Education.

Those who fail or did not take the test (and do not possess one of the exemptions listed above) are required to pass the remedial course FOUN0100: Fundamentals of Written English and then to do the two Level I English Language Foundation courses. FOUN0100 is coordinated by the Academic Literacies Unit of the Faculty of Humanities and Education and is presently offered in both semesters for a fee of BBD\$500 and in the Summer School for the regular Summer School fee.

## INTERNATIONAL EXCHANGE/STUDY

The exchange programme allows students to spend one or two semesters abroad at overseas universities in order to broaden their experience, understanding and perception. Such exchanges typically take place in Year 2 of the BSc degree and the application deadline is December 1st of the year prior to the exchange. UWI students, while at exchange Universities, continue as regular full-time students of the University of the West Indies. They pay UWI tuition and other fees and pursue matching and approved courses for credit. Credits earned abroad are transferred to UWI and applied to regular Faculty degree requirements in accordance with Regulation 38. For study abroad the requirements may vary. Interested students are advised to consult the International Exchange/Study Abroad brochure available from the Admissions Section of Student Affairs. This contains a current list of universities with which The UWI has entered into cooperative arrangements for study exchanges.

**Programmes of study must be pre-approved by the Dean.**

# GENERAL STUDENT INFORMATION

## ACADEMIC ADVISORS

Academic counselling is available for all students within the Faculty. Whether you need to discuss your academic progress, are experiencing difficulty in your academic programme, need help with your degree requirements, course selection etc., an Academic Advisor is available to assist you.

Each student is assigned an Academic Advisor for the duration of his/her undergraduate career and is advised to meet with this Advisor at least once per semester. Students should contact their Department or check their CHOL account to learn who their Academic Advisor is and to arrange a meeting as early as possible.

## COURSES AND TIMETABLING

The Faculty reserves the right to withdraw or to add courses as may be necessary or desirable but, except in cases of extreme emergency or difficulty, no course will be added or withdrawn during an academic year. The Faculty does not guarantee that all courses listed in the following pages will be available this academic year. Additionally, timetabling constraints may impose restrictions on the combinations of courses permissible. Students are not permitted to register for courses that clash on the timetable.

## COURSE REGISTRATION

Students are required to register for courses each semester that make up their declared major. They may also register for elective courses provided these can be accessed. See Regulations for the [number of credits](#) that may be taken per semester/academic year.

A maximum of one (1) co-curricular course (3 credits) at either level II or III can count towards the overall number of courses for the degree. However, co-curricular courses are awarded on a pass/fail basis and are not used in calculating the class of degree.

## MAJOR

Students admitted to the Faculty must declare a Major, or a Double Major. A Major is a student's principal subject area of study: for example, if a student is pursuing a degree in Biology, then Biology is their "Major". This Major (30 credits taken from level 2/3) must be declared from among the following subjects offered by the Department of Biological and Chemical Sciences: Biochemistry, Biology, Chemistry, Ecology, Environmental Sciences and Microbiology, or from among the following subjects offered by the Department of Computer Science, Mathematics and Physics: Computer Science, Electronics, Information Technology, Mathematics, Physics, Software Engineering (in association with UWICIIT) or from Meteorology (in association with CIMH). Students

## THE FACULTY OF SCIENCE AND TECHNOLOGY UNDERGRADUATE PROGRAMMES AND COURSES HANDBOOK 2023-2024

may also declare a Double Major in two subjects offered in the Faculty of Science and Technology.

### CREDITS AND EXEMPTIONS

Credits/Exemptions may be awarded for courses already passed at this or another institution. Undergraduate students applying for credit/exemptions should make such requests through their respective Deans or the Office of Student Affairs – Admission. An official transcript is required for assessment by the appropriate authority. Requests for Credits/Exemptions must be made before the start of registration.

### ACADEMIC SUPPORT SERVICES

Academic support services and workshops, offered by the Office of Student Services and Development (OSSD) are available to all undergraduate and graduate students of The University of the West Indies, Cave Hill Campus.

The Academic Support Drop-in Clinic offers one-on-one and group consultations by appointment using an online scheduling system [tinyurl.com/OSSBookings](http://tinyurl.com/OSSBookings). Students benefit from support from an Academic Support Specialist in the areas of their concerns as follows:

- Time management
- Procrastination
- Organisation
- Academic study skills
- Revision strategies
- Motivation
- Presentation skills
- Effective notetaking
- Group work

Practical interventions include coaching on:

- Encouragement to utilize Lecturer Office Hours where it is felt that specific feedback on academic performance is required and clarity on coursework.
- Referral to other Campus resources/services.

To access the academic support services offered by the OSSD, call 417-4165 or schedule an appointment via [www.tinyurl.com/OSSBookings](http://www.tinyurl.com/OSSBookings) or [www.cavehill.uwi.edu/studentservices](http://www.cavehill.uwi.edu/studentservices).

### ACCOMMODATION FOR STUDENTS WITH DISABILITIES

The UWI Cave Hill Student Disability Policy promotes “an inclusive campus that enables the productive participation of all students regardless of disability” and calls for the provision of accommodations for students with disabilities. Students with disabilities may receive reasonable accommodations to enable them to participate in all aspects of campus life. Click [here](#) to download the Disability Policy.

“Reasonable accommodation is a modification to the delivery of instruction and method of assessment for a course, program, facility or service that seeks to eliminate or minimizes disability-related

barriers. It aims to facilitate the student's learning experience and for the instructor to fairly evaluate the student's progress without interference from the disability."

All students are required to meet approved standards of competency in all aspects of their work, and students with disabilities are no exception. The provision of an accommodation does not mean compromising the content, quality or level of instruction.

### PRELIMINARY STEPS:

- Before coming to Cave Hill Campus find out about Services to Support persons with disabilities.
- Peruse the UWI website to find out about the services being offered, to support students' success.
- Visit the Office of Student Services and speak to the Disability Services Coordinator (DSC) to discuss your functional limitations and concerns. All information is kept confidential.
- Complete the Application for Accommodation for Persons with Disabilities ([Click here](#)) and submit it to the Office of Student Services in a sealed envelope. You are required to provide documentation of your disability from a certified services provider, e.g., doctor, educational psychologist, occupational therapist.
- Register with the Student Health Clinic (SHC). Complete the online registration form: [www.cavehill.uwi.edu/student-services/health-wellness/health-clinic/registration.aspx](http://www.cavehill.uwi.edu/student-services/health-wellness/health-clinic/registration.aspx).
- Complete Student Intake Questionnaire. This form consists of a series of questions that provide historical information related to their functional limitations and accommodations. This form will be given when you meet with the DSC to discuss accommodations.

## UNIVERSITY REGULATIONS ON PLAGIARISM

*(First Degrees, Diplomas and Certificates)*

### APPLICATION OF THESE REGULATIONS

1. These Regulations apply to the presentation of work by a student for evaluation, whether or not for credit, but do not apply to invigilated written examinations.

### DEFINITION OF PLAGIARISM

2. In these Regulations, "plagiarism" means the unacknowledged and unjustified use of the words, ideas or creations of another, including unjustified unacknowledged quotation and unjustified unattributed borrowing;

"Level 1 plagiarism" means plagiarism which does not meet the definition of Level 2 plagiarism;

"Level 2 plagiarism" means plagiarism undertaken with the intention of passing off as original work by the plagiariser work done by another person or persons.

3. What may otherwise meet the definition of plagiarism may be justified for the purposes of Regulation 2 where the particular unacknowledged use of the words, ideas and creations of another is by the standards of the relevant academic discipline a function of part or all of the object of the work for evaluation whether or not for credit, for example:
  - a. The unacknowledged use is required for conformity with presentation standards;
  - b. The task set or undertaken is one of translation of the work of another into a different language or format;
  - c. The task set or undertaken requires producing a result by teamwork for joint credit regardless of the level of individual contribution;
  - d. The task set or undertaken requires extensive adaptation of models within a time period of such brevity as to exclude extensive attribution;
  - e. The task set or undertaken requires the use of an artificial language, such as is the case with computer programming, where the use of unoriginal verbal formulae is essential.
4. It is not a justification under Regulations 2 and 3 for the unacknowledged use of the words, ideas and creations of another that the user enjoys the right of use of those words, ideas and creations as a matter of intellectual property.

## OTHER DEFINITIONS

5. In these Regulations:  
“*Chairman*” means the Chairman of the relevant Campus Committee on Examinations;  
“*Examination Regulations*” means the Examination and other forms of Assessment Regulations for First Degrees Associate Degrees Diplomas and Certificates of the University;  
“*set of facts*” means a fact or combination of facts.

## EVIDENCE OF PLAGIARISM

6. In order to constitute evidence of plagiarism under these Regulations, there shall be identified as a minimum the passage or passages in the student’s work which are considered to have been plagiarised and the passage or passages from which the passages in the student’s work are considered to have been taken.

## STUDENT STATEMENT ON PLAGIARISM

7. When a student submits for examination work under Regulation 1, the student shall sign a statement, in such form as the Campus Registrar may prescribe, that as far as possible the work submitted is free of plagiarism including unattributed quotation or paraphrase of the work of another except where justified under Regulation 3.
8. Quotation or paraphrase is attributed for the purpose of Regulation 7 if the writer has indicated using conventions appropriate to the discipline that the work is not the writer’s own.
9. The University is not prohibited from proceeding with a charge of plagiarism where there is no statement as prescribed under Regulation 7.

## ELECTRONIC VETTING FOR PLAGIARISM

10. The results of any electronic vetting although capable, where the requirements of Regulation 7 are satisfied, of constituting evidence under these Regulations, are not thereby conclusive of any question as to whether or not plagiarism exists.

### **LEVEL 1 PLAGIARISM**

11. In work submitted for examination where the Examiner is satisfied that Level 1 plagiarism has been committed, he/she shall penalise the student by reducing by no more than 10%, the mark which would otherwise have been awarded, taking into account any relevant Faculty regulations.

### **LEVEL 2 PLAGIARISM**

12. Where an examiner has evidence of Level 2 plagiarism in the material being examined, that examiner shall report it to the Head of Department or the Dean and may at any time provide the Registrar with a copy of that report. In cases where the examiner and the Dean are one and the same, the report shall be referred to the Head of the Department and also to the Campus Registrar.

13. Where any other person who in the course of duty sees material being examined which he or she believes is evidence of Level 2 plagiarism that other person may report it to the Head of Department or the Dean and may at any time report it to the Campus Registrar who shall take such action as may be appropriate.

14. Where a Dean or Head of Department receives a report either under Regulation 12 or 13, the Dean or Head of Department, as the case may be, shall

- a. where in concurrence with the report's identification of evidence of Level 2 plagiarism, report the matter to the Campus Registrar; or
- b. where not concurring in the identification of evidence of plagiarism, reply to the examiner declining to proceed further on the report; or
- c. where concluding that there is evidence of Level 1 plagiarism, reply to the examiner

indicating that conclusion and the Examiner shall proceed as under Regulation 11.

15. Where a report is made to the Campus Registrar under Regulation 14a or 16, the Campus Registrar shall lay a charge and refer the matter to the Campus Committee on Examinations.

16. Where the Campus Registrar receives a report alleging Level 2 plagiarism from the Examiner or any other person except the Dean or Head of Department, the Campus Registrar shall refer the matter to a senior academic to determine whether there is sufficient evidence to ground a charge of plagiarism and where such evidence is found, the Campus Registrar shall proceed as under Regulation 15.

17. Where the matter has been referred to the Campus Committee on Examinations pursuant to Regulation 15, the proceedings under these Regulations prevail, over any other disciplinary proceedings within the University initiated against the student based on the same facts and, without prejudice to Regulation 21, any other such disciplinary proceedings shall be stayed, subject to being reopened.

UNDERGRADUATE PROGRAMMES AND COURSES HANDBOOK 2023-2024**

5. The following types of courses, which may consist of both theoretical and practical parts, are offered by the University:
  - a. Courses taught by the Science Faculties (in-Faculty courses) include Preliminary (Level 0) and Levels 1, 2 and 3 courses. (Preliminary courses may be used to satisfy entry requirements of Regulation 1 above, but do not contribute towards the requirements for the award of a degree.)

They may not be substituted for Foundation Courses. Co-curricular credits gained in excess of three will be entered on the student's transcript but will not contribute toward the requirements for the degree.
  
6. Courses normally extend over not more than one semester, but in special cases may extend over two semesters. The contact hours for a course are expressed in terms of Credit Hours (credits) and the credit-rating of a course is determined by the Faculty which administers the course. (See [Glossary](#)).

- iii. have a Degree GPA of at least 2.00.

### C. REGISTRATION

8. A student pursuing a degree in the Faculty may register [full-time](#) or [part-time](#). A student who is in full-time employment may pursue a degree on a part-time basis only.
  
9. Students must register for courses at the beginning of the academic year. Time limits governing changes in registration are as outlined in the student handbooks for each Campus. A student is deemed to be registered for a course only after his/her financial obligations to the University have been fulfilled.

10. Registration for any course (except audited courses) automatically implies entry for the associated examinations. A student who fails to attend the examinations without having previously withdrawn from the course (see Reg.9), or without having tendered evidence of illness at the time of the examinations, certified by a medical practitioner recognized by the University, will be deemed to have failed the course. Medical certificates must reach the Campus Registrar no later than seven days after the date of the examination concerned.
11. a. A student who has passed a course will not be permitted to re-register for that course.  
b. Likewise, students may not register for Preliminary courses in a subject which overlaps substantially with any CAPE/GCE A-Level courses (or equivalent) previously passed.
- c. A student must not register for less than two courses in any one semester, except with the permission of the Dean.
- d. The normal load for a full-time student is 15 course credits per semester, plus one Foundation course i.e.: 33 credits over Semester I & II.
14. The maximum number of credits for which a student may register in any one semester is 18 credits, if full-time, and 11 credits, if part-time.
15. a. Students must make a final declaration of their proposed major(s) and/or minor(s) by the end of the registration period of the semester in which they intend to graduate.  
b. Students must graduate as soon as they have met the requirements for the degree for which they are registered.

#### D. PROGRESS THROUGH THE PROGRAMME

12. Students admitted into the four-year degree programme (Reg.2) who have already obtained one CAPE/GCE A-level pass (or equivalent) in an approved science subject, may be permitted to register for up to **9** credits of Level 1 courses.
13. a. Full-time Part I students are required to register for a minimum of **12** credits from Faculty courses and Foundation course, per semester. A student registering for less than twelve credits will be deemed to be a part-time student.  
b. In order to register for Level 2 courses, a student must normally pass a minimum of **18** credits in Level 1 Faculty courses. At least **12** of these credits must be from in-Faculty courses.

#### E. EXAMINATIONS

16. In order to pass a course, a student must have been in satisfactory attendance at the course and must have satisfied the examiners in the associated examinations.
17. The examination associated with each course shall be conducted mainly by means of written and/or practical papers, normally taken at the end of the semester in which the candidate has registered for the courses concerned. However, oral examinations as well as performance in course work in the form of essays, in-course tests, research papers, projects, or continuous assessment of theoretical and/or practical work may contribute towards the final grade awarded in a course.

18. a. When practical papers and/or practical coursework contribute towards an examination, candidates must satisfy the examiners in both the theoretical and practical aspects of the course. On the basis of performance in the practical component of the course, a candidate may, on the recommendation of the Department concerned, be exempted from the practical part of the examination.
- b. To obtain a pass in Computer Science and Mathematics courses, candidates must pass both coursework and final examination.
19. A candidate who marginally fails the examination associated with a Preliminary or Level 1 course may, if recommended by the relevant Department, be granted permission by the Board of Examiners to sit a Supplemental Examination. Such permission will be given on the basis of the performance of the candidate in the courses concerned.
20. A finalist who marginally fails a course needed for graduation, having satisfied the Departmental requirements, may, at the discretion of the Faculty Board of Examiners, be offered a Supplementary Oral. Any candidate who satisfies the examiners in a Supplementary Oral will be given the minimum passing grade in the course. No more than two Supplementary Orals may be gained. However, a third oral examination may be granted to final year students in circumstances when passing a single course is all that is required. A Supplemental Oral precludes the student requesting a Remark.
21. A candidate who fails the examination associated with a course may be given permission to repeat the course and the examination on a subsequent occasion. In the event that such a candidate has satisfied the examiners in the coursework, the candidate may, on the recommendation of the relevant Department, be exempted from the coursework passed. If such a recommendation has been made, the candidate may apply to the Dean for permission to take the examination without attending the course (Exam Only).
22. The Academic Board of a candidate's Campus on the recommendation of the Faculty Board concerned, may debar the candidate from writing the examination associated with a course if the candidate has not attended and/or performed satisfactorily in the course. **The grade for such a candidate will be recorded as Absent Fail.**

## F. GPA AND CLASS OF DEGREE

23. a. A Semester grade point average which includes all approved courses for which the student is registered in a semester, whether passed or failed, will be calculated for the determination of academic standing.
  - b. A Cumulative grade point average which includes all courses completed excluding those taken on a Pass/Fail basis, audited courses, Preliminary courses and courses designated I or IP will be calculated and recorded on the student's transcript.
  - c. A Degree grade point average including all Level 2 and 3 courses, whether passed or failed, will be calculated for determination of the class of the degree. (See [Appendix IV](#) for the relationship between marks, grade point average and class of degree).
24. All courses included in the computation of the grade point averages in Regulation 23, are weighted according to their credit rating.

## G. LEAVE OF ABSENCE AND VOLUNTARY WITHDRAWAL

25. a. A student who wishes to be absent from the Faculty for a semester or more may apply for Leave of Absence, through the Dean, to the campus Academic Board, stating the reasons for the application.
- b. Leave of Absence will not be granted for more than two consecutive semesters in the first instance. However, students may apply for an extension of leave.
- c. Leave of Absence will not be granted for more than four consecutive semesters.
- d. Applications for Leave of Absence or extension thereof should normally be submitted by the end of the registration period in the relevant semester.

26. A student who registers for no courses in two successive semesters without having obtained Leave of Absence will be deemed to have withdrawn from the Faculty.
27. A student who voluntarily withdraws from the university and who applies for re-admission within five years shall be granted exemption and credit for all courses previously passed unless the Department concerned declares that the material covered in a course has become outdated. All grades previously obtained except those for courses declared outdated shall be used in the determination of the GPA of such a student.

## H. TIME LIMITS FOR COMPLETION & ENFORCED WITHDRAWALS

28. For the purposes of Regulations 29 & 30 below, any semester in which a student is registered part-time or any registration for the maximum number of credits for Summer school will be counted as half of a semester of full-time study. After the total of equivalent full-time study has been obtained in this way, it will be rounded down to a whole number.
29. a. A student whose Semester Grade Point Average is less than 2.00, will be deemed to be performing unsatisfactorily and will be placed on Warning.
- b. A student on Warning, whose Semester grade point average is less than 2.00, will be Required To Withdraw from the Faculty.
30. a. Students admitted to the programme under Reg.1 shall complete the requirements for the degree in a minimum of six or a maximum of ten semesters of full-time study.
- b. Students admitted to the programme under Reg.2 shall complete the requirements for the degree in a minimum of eight or a

---

- maximum of twelve semesters of full-time study.
- c. Students who cannot complete the programme within the maximum periods given in (a) and (b) above will normally be Required To Withdraw from the Faculty at the end of the academic year in which the maximum is reached.
31. In the event that a student has exhausted the maximum periods mentioned in Reg.30 above, but still requires for the completion of the degree programme,
- Either:
- a. passes in courses totalling no more than six credits,
- or:
- b. passes in Foundation courses only, the Faculty Board may at its discretion recommend to Academic Board an extension of the period of study by one or two semesters.
32. For the purposes of Regulations 28 to 31 above, any semester for which a student has obtained Leave of Absence from the Faculty shall not be counted (see Reg.25).
33. Notwithstanding Regulations 28 to 32 above, Academic Board may, on the recommendation of the Faculty Board, require the student to Withdraw from the Faculty at the end of any semester on grounds of persistent neglect of work and/or repeated failure in examinations.
34. A student **Required To Withdraw** from one Faculty:
- a. may register immediately in another, if in the opinion of the student and the Dean of the receiving Faculty this is desirable, and the student satisfies that Faculty's entry requirements;
- b. will be required automatically to withdraw from the University if not granted registration in another Faculty; and
- c. may not register in the ensuing Academic Year, for any courses in the Faculty from which (s)he had been Required To Withdraw.

- d. Subject to The UWI Grade Point Average Regulation 11, courses pursued at an institution other than the UWI during the period of withdrawal may be eligible for credit.
- e. Courses pursued in The UWI Summer School during the period of withdrawal shall be included in all relevant grade point average calculations if the student re-enters the UWI.

## I. EXEMPTIONS AND TRANSFERS

36. Holders of degrees from approved universities, or candidates who have partially fulfilled the requirements of such degrees, may apply to the Board for Undergraduate Studies, through the Faculty Board of the candidate's campus, for exemption from Level 1 courses. Each such application will be considered on its own merit.
37. Students on transfer between different BSc degree programmes or from other programmes of study within the University may, on the basis of passes already obtained, and on the recommendation of the Departments concerned, be exempted from some or all of the Level 1 courses, and some of the Level 2 and/or Level 3 courses. Students exempted from all Level 1 courses may complete the degree programme in a minimum of four or a maximum of eight semesters of full-time study from the time of transfer. ## APPENDIX III

### THE FOREIGN LANGUAGE REQUIREMENT

(for students entering academic year 2022/23 or after)

1. All students registered in the Faculty of Science and Technology who did **not** have at least CSEC General Grade II before 1998, or Grade III after 1998, or its equivalent, in a foreign language are required to complete three (3) credits from one of the following beginners' foreign language courses:
  - CHIN1001 Chinese Language 1A
  - FREN0101 Beginners' French
  - SPAN0101 Beginners' Spanish
  - PORT1001 Portuguese Language 1A
  - Any other language course as approved by the Faculty of Science and Technology

A student may substitute one of the non-language Foundation Courses (i.e., FOUN1101 or FOUN1301) with a foreign language course at the level of their competence.

2. All international students whose first language is not ENGLISH and who matriculated into the Faculty of Science and Technology with English as a Second Language (ESL) qualifications shall be exempted without credit from this requirement.
3. Students may opt not to take a UWI foreign language course and choose instead the self-directed learning path to foreign language competency. Those who do so must demonstrate competency to the satisfaction of the UWI, that is at the Common European

Framework of Reference for Language: Learning, Teaching, Assessment (CEFR) A1 or its equivalent in other systems.

4. Students who do not possess certification in a foreign language but might have pursued a foreign language may take a proficiency test to demonstrate their competence to the satisfaction of the UWI (i.e., CEFR A1 or its equivalent).
5. Students may fulfil this requirement at any time during their undergraduate programme.

### FOUNDATION COURSES

FOUN 0100 – Fundamentals of Written English  
<sup>1</sup>FOUN 1006 – Exposition for Academic Purposes  
<sup>1</sup>FOUN 1008 – An Introduction to Professional Writing  
<sup>\*</sup>FOUN 1101 – Caribbean Civilization  
<sup>2</sup>FOUN 1201 – Science, Medicine & Technology in Society  
<sup>\*</sup>FOUN 1301 – Law, Governance, Economy & Society

<sup>1</sup> Both courses cannot be taken - students must choose one or the other.

<sup>2</sup> Not available to Science Faculty Students.

<sup>\*</sup>A student may substitute one of these with a Foreign Language course.

### FOUN 0100 FUNDAMENTALS OF WRITTEN ENGLISH (0 Credits)

This course is required for all students entering the University who are not exempted from the Proficiency Test or have not taken it or failed it.

**FOUN 1006 EXPOSITION FOR ACADEMIC PURPOSES (3 Credits)**

This course is designed to: (1) equip students with the study and research skills they will need in order to get the maximum benefit from all their courses at the University; (2) familiarize them with the linguistic situation in the Caribbean and break down common misconceptions they usually have about it; (3) introduce students to the rhetorical modes of discourse; and (4) develop skill in critical thinking and reading. (Cannot be taken with FOUN1008)

**FOUN 1008 AN INTRODUCTION TO PROFESSIONAL WRITING (3 Credits)**

This course is designed to help students develop skills common to all professional, workplace-oriented writing, whether in business or science. (Cannot be taken with FOUN1006)

**FOUN 1101 CARIBBEAN CIVILIZATION\* (3 Credits)**

**FOUN 1201 SCIENCE, MEDICINE AND TECHNOLOGY IN SOCIETY<sup>1</sup> (3 Credits)**

The overall aim of the course is to develop the ability of the student to engage in an informed manner in public discourse on matters pertaining to the impact of science, medicine and technology on

society. The course will help students to appreciate the essential characteristics of the scientific method as a mode of enquiry into nature and to understand why it provides the foundations of the technological world. (Students in the Faculty of Science and Technology cannot take this course)

**FOUN 1301 LAW, GOVERNANCE, ECONOMY AND SOCIETY\* (3 Credits)**

This is a multi-disciplinary course of the Faculty of Social Sciences which is designed mainly for non-Social Sciences students. It will expose them to both historical and contemporary aspects of Caribbean society, including Caribbean legal, political and economic systems. In addition, Caribbean culture and Caribbean social problems are discussed.

<sup>1</sup> Not available to Science Faculty Students

**REPLACING A FOUNDATION COURSE WITH A FOREIGN LANGUAGE COURSE**

Students in the Faculty of Science and Technology may replace FOUN1101 Caribbean Civilization OR FOUN1301 Law, Governance, Economy and Society with a foreign language course in French, Spanish, Portuguese or Chinese. Students seeking to do such should notify the faculty office via use of Foundation Course Substitution Form on the student resources page of the faculty website, found [HERE](#).

## BIOLOGICAL SCIENCES

The Department of Biological & Chemical Sciences offers Single Majors in Biochemistry, Biology, Ecology, Environmental Science and Microbiology as well as Double Majors in Biological Sciences and Chemistry. Biology, Biochemistry, Ecology and Microbiology Majors may not be combined; students wishing to pursue such Double Majors must instead register for the Biological Sciences Double Major. Only the Biology, Biochemistry or Environmental Science Major may be combined with the Chemistry Major. Only the Biology or Ecology Major may be combined with the Environmental Science Major or Minor. Students wishing to combine a Biology, Biochemistry, Ecology or Microbiology Major with a Major of another discipline must seek the approval of the Dean and are advised that timetable clashes of courses may make it improbable to complete such degrees in the minimum 3-year period.

**It is a requirement in the Biological Sciences that students must pass both  
Theory and Practical components where applicable.**

## ENVIRONMENTAL SCIENCE

The Department of Biological & Chemical Sciences offers a Single Major and Minor in Environmental Science. Only the Biology, Ecology, Chemistry and Meteorology Major may be combined with the Environmental Science Major or Minor. Students wishing to combine Environmental Science Major with a Major of another discipline, such as Management or another major outside of the Faculty must seek the approval of the Dean and are advised that timetable clashes of courses may make it impossible to complete such degrees in the minimum 3-year period.

Students will work under the guidance of a workplace supervisor as well as an on-campus supervisor and will submit a report and make a presentation within the Department or Major at the end of the internship. Through exposure to the working environment, students will acquire transferable skills that will be useful in any future employment sphere.

*Teaching:* The professional placement in an organisation will normally take place during the summer school period, and students will be registered for the course as a summer school course. Students intending to register for the course in summer must present an up-to-date curriculum vitae (CV) to the course coordinator by a stated deadline in semester 2. At the same time, host organisations will meet with the course coordinator and provide a summary of possible activities (work plan) successful students would undertake in their organisation. Student CVs will be circulated to potential workplace supervisors and the course coordinator will assign placements to the mutual satisfaction of the students and host organisations. Students must attend

the orientation workshops and may have to attend an interview before embarking on the professional placement.

*Syllabus:* This course is being offered by The UWI China Institute of Information Technology (UWICIIT) as a part of their 2+2 BSc Software Engineering programme (students in this programme will spend the first two years at The UWI and the final two years in China). The UWICIIT is a collaborative effort between The UWI and the Global Institute of Software Technology (GIST) located in Suzhou, China. The UWICIIT is located at four sites, namely at the Cave Hill Campus, the Mona Campus, the St. Augustine Campus and at the Open Campus. The Software Engineering Capstone Project I course is the first of two courses where students will design and build a real-world software product based on the knowledge gained during the course of their studies. In this first course, students, as a part of a group, will be required to identify and document a project idea in the form of a project proposal, then formulate a plan for the entire project duration (both semesters). Adopting an incremental and iterative approach to software development, students will be required to identify requirements, create specifications, create a design, test and release versions of the product several times during the semester. By the end of the first semester (that is, by the end of this course), the project group will have created a project proposal, a project plan, software engineering documents and at least one version of the software product. Teaching: Project groups will be supervised by one or more faculty members. In some circumstances, depending on the nature of the project, project groups may be co-supervised by industry/external partners. Students will normally be expected to meet with their supervisor(s) on a weekly basis to discuss progress, determine solutions to obstacles and plan future work. Supervisors will also guide students in the production of the project documentation and software. Private discussion forums will be associated with the course to allow students and supervisors to discuss issues and solutions related to the projects. A public discussion forum targeted at all of the students completing the course will be used to address general class-based issues. MyElearning will be used to: distribute any necessary course materials, post completed assessments, distribute grades and return feedback to students (e.g., from assignments).

*Method of Examination:* The course will be assessed by means of 100% coursework as follows:

Project Proposal:	10%
Project Plan:	20%
Software Engineering Documentation:	30%
Software Product:	40%

### **MATH3955 - MATHEMATICS INTERNSHIP (3 CREDITS)**

*Pre-requisites:* GPA of 3.0 or above in the Mathematics major. The student must have completed or be enrolled in courses totalling 60 credits or more. The department must approve the student. Approval by the department does not however guarantee placement. Enrolment in internship is subject to successful placement at a participating host organization.

*Objectives:* To provide the opportunity for students to gain workplace experience to improve their employment readiness by the time of graduation.

*Syllabus:* The course provides a formal internship of at least 4 weeks (160 hours) duration at a relevant private sector, public sector or non-Governmental organisation during which students undertake agreed upon activities relevant to their studies. Students will work under the guidance of a workplace supervisor as well as an on-campus supervisor and will submit a report and make a presentation within the Department at the end of the internship. Through exposure to the working environment, students will acquire transferable skills that will be useful in any future employment sphere. The professional placement in an organisation will normally take place during the summer school period, and students will be registered for the course as a summer school course. Students intending to register for the course in summer must present an up-to-date curriculum vitae (CV) to the course coordinator by a stated deadline in semester 2. At the same time, host organisations will meet with the course coordinator and provide a summary of possible activities (work plan) successful students would undertake in their organisation. Student CVs will be circulated to potential workplace supervisors and the course coordinator will assign placements to the mutual satisfaction of the students and host organisations. Students may have to attend an interview before embarking on the professional placement.

*Pre-requisites:* GPA of 3.0 or above in the Physics major. The student must have completed or be enrolled in courses totalling 60 credits or more. The department must approve the student. Approval by the department does not however guarantee placement. Enrolment in internship is subject to successful placement at a participating host organization

*Objectives:* To provide the opportunity for students to gain workplace experience to improve their employment readiness by the time of graduation.

*Syllabus:* The course provides a formal internship of at least 4 weeks (160 hours) duration at a relevant private sector, public sector or non-Governmental organisation during which students undertake agreed upon activities relevant to their studies. Students will work under the guidance of a workplace supervisor as well as an on-campus supervisor and will submit a report and make a presentation within the Department at the end of the internship. Through exposure to the working environment, students will acquire transferable skills that will be useful in any future employment sphere.

The professional placement in an organisation will normally take place during the summer school period, and students will be registered for the course as a summer school course. Students intending to register for the course in summer must present an up-to-date curriculum vitae (CV) to the course coordinator by a stated deadline in semester 2. At the same time, host organisations will meet with the course coordinator and provide a summary of possible activities (work plan) successful students would undertake in their organisation. Student CVs will be circulated to potential workplace supervisors and the course coordinator will assign placements to the mutual satisfaction of the students and host organisations. Students may have to attend an interview before embarking on the professional placement.

*Method of Examination:*

Student's Placement Report	50%
Workplace Supervisor's Appraisal	35%
Oral presentation of report	15%
